

Electrical Engineer for hire at Reynolds Systems

The candidate we're seeking should have 0 to 5 years of experience. We need support in design and manufacturing of fairly simple solid state high voltage/ high current switching devices. Support includes reviewing existing designs, making minor modifications under the guidance of a more experienced EE, board layout, parts procurement, and liaison to quality control. Candidate will interface with all internal departments as well as vendors responsible for fabrication and population of our and our customer's designs. Experience with Labview and Python is a desirable, but not required.

Salary will be based on experience including internship(s). We offer a very competitive salary and benefits package including health, 401k, and yearend bonus.

Our company is located in South Lake County, CA. We are in a rural area and prefer employees with ties to Lake, Mendocino or Sonoma Counties. We are a DoD contractor and can only hire US citizens.

For more information or to apply, please contact Charlie Hart at chart@reynoldssystems.com.
